

POWER & CONTROL

NFB™ 4.2 ROTARY STEERING

Patented No FeedBack Steering Helm for about the cost of a standard rotary steering replacement. With the advantage of 4.2 turns lock-to-lock and our patented No FeedBack steering to lock out steering loads, the 4.2 Rotary NFB Steering is the ideal single-cable system for most non-power-steered boats. The rugged dual cable system is made for applications with engine flutter or steering instability. The helm is a drop-in replacement for current generation Safe-T with no dash modifications required.

COMFORTABLE
LOCK-TO-LOCK TURNS

Mobile living made easy.

 **DOMETIC** **OUTDOOR**

SINGLE & DUAL CABLE SYSTEMS THAT PROVIDE MAXIMUM CONTROL.

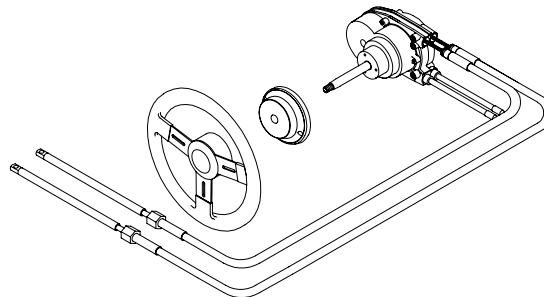

NFB 4.2 single-cable systems are suitable for most single-station boats with a single non-power-assisted outboard and sterndrive engines up to V-6 and minimal engine flutter or steering instability. 4.2 accepts wheels up to 16" diameter.

Use dual cable system for boats with engine flutter or steering instability.

Replaces Dometic Safe-T® steering systems (including twin cable) without dash modification.

NFB™ 4.2 Single Cable System
(Steering Wheel not included.)

NFB™ 4.2 Dual Cable System
(Steering Wheel not included.)

Features

- Patented No FeedBack™ Steering mechanism
- Twin cable system available for maximum control
- Comfortable 4.2 turns from lock-to-lock
- Standard 3/4" tapered steering shaft
- Stainless steel cable output ends
- Fast, easy installation: uses Dometic Quick Connect (QC) steering cable
- Kits include: cable (2 Cables for dual system), helm, 90° bezel and hardware
- Meets A.B.Y.C. standards
- Meets N.M.M.A. certification requirements
